

Draft Community Rolling Action Plan (CoRAP) update for years 2016-2018

The draft plan is an annual update of the current CoRAP 2015–2017 and covers the next subsequent years 2016-2018. It contains substances suspected of posing a risk to human health or the environment. Substance evaluation is the process under REACH Regulation (EC) No 1907/2006 (Articles 44 to 48) that allows for clarification of such potential risks.

This draft plan introduces 138 substances that are proposed for Member States (MS) to review under the substance evaluation process. It contains 53 substances newly allocated to the MSs and 85 substances already included in the CoRAP update published on 17 March 2015. The substances are tentatively divided for evaluation in years 2016, 2017 and 2018. At this stage it includes the non-confidential substance names, CAS- and EC-numbers, the initial grounds for concern and the contact details of the MS who intends to conduct the substance evaluation.

This draft plan has been prepared in close cooperation with the MSs, taking into account the criteria for selection of substances¹. The MSs have also proposed substances based on national priorities. In many cases the initial concerns are related to PBT²-properties, suspected endocrine disruption, or carcinogenic, mutagenic and reprotoxic properties in combination with wide dispersive use or consumer uses. In general, the uses of these substances cover various areas and are not limited to particular industrial, professional or consumer uses. To assure a consistent approach in evaluation of structurally similar substances, the substance evaluation process for identified structural similar substances will be preferably performed by one MS in one evaluation year. In case two or more MSs will evaluate the group of substances they shall collaborate to assure consistent approach in evaluation process.

The draft plan has been submitted on 15 October 2015 to the Member State Competent Authorities and the ECHA Member State Committee. The Committee will prepare an opinion on the draft CoRAP update in February 2016. On the basis of the Committee's opinion ECHA will adopt by the end of March 2016 the final CoRAP update for 2016-2018. The final CoRAP update 2016-2018 will also indicate a justification document for each individual substance.

By publishing this draft now ECHA wishes to inform the stakeholders of the progress made and to facilitate early communication between the involved registrants and the relevant evaluating Member State.
